This involves analyzing and debugging through code that incorporates concepts like process-pairs for high availability, message passing for IPC, semaphores and locks for concurrency control, Posix interface, name translation for mapping between Posix and Native File system." "

Web services based information system

Academic Project

Developed and deployed various web services for the institute over the local intranet. The objective was to facilitate information retrieval from the database on the web services paradigm, so that a developer could use and integrate the deployed services in applications."

Secure e-commerce website

Academic Project

deployment of SSL security."

The chief objective of the project was to enable secure online payments and providing security with passwords.

Online Registration for Institute

Academic Project

Designed centralized database for all the student related information in the institute. Also developed an online system for remote registration for the students at the beginning of the semester, which included fee payments, no-dues clearances and hostel allotment."

Map website

Hobby projects

A website where important and useful Bangalore routes would be displayed using markings on google maps. <http://www.morebangalore.com>."

Orkut application for group outings

Hobby projects

The orkut application would help the user to create his own outing plans and invite friends to join, or may join plans created by friends. Coded using the open-social APIs for javascript."

Personized feed aggregator

Hobby projects

A feed aggregator that would download RSS feeds from relevant sources and serve them to clients connected. The aggregator would learn the relevance of sources by analysing the users interaction with the feeds. Coded in Python. Status: incomplete"

Achievements

1. E-award at HP for developing a proof of concept for the idea-fest entry and patent application for 'bookkeeping based memory management algorithm using bitmaps'. This involved design and coding of a memory manager based on the new algorithm, and a surrounding environment to test its performance against the existing algorithms.
2. Coordinated in organizing Avishkar and Gnosiomania, the technical and quiz festival at the institute.
3. Awarded B-Man Title, in Avishkar 04 Business events.
4. Merit scholarship awarded by college.
5. Held the school head-boy position.
6. j2984524578.
